 Portfolio :- <https://github.com/krashmeet033-sys/FINAL-PORTFOLIO>

Developer Profile

Passionate Computer Science Engineering student focused on building practical software solutions through programming, web development, and continuous learning. Experienced in developing interactive web applications, browser-based games, algorithmic solutions, and object-oriented programming projects. Actively exploring Artificial Intelligence, Data Structures & Algorithms, and modern frontend technologies while building a strong foundation in software engineering principles.

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering

ITM Skills University, Navi Mumbai

2025 – 2029

Relevant Coursework :-

- Programming Fundamentals

- Data Structures & Algorithms
- Object-Oriented Programming
- Web Development
- Database Management Systems
- Artificial Intelligence Fundamentals

Technical Skills

Programming Languages

- C++
- Python
- JavaScript
- HTML5
- CSS3

Web Development

- Responsive Web Design
- Front-End Development
- JavaScript DOM Manipulation
- API Integration Basics

Core Concepts

- Data Structures & Algorithms
- Object-Oriented Programming
- Problem Solving
- Software Development Fundamentals
- Debugging & Testing

Tools & Technologies

- Git
- GitHub
- Visual Studio Code
- Google AI Studio

- Microsoft Office
- Canva
- Figma (Basic)

Currently Learning

- React.js
- Artificial Intelligence
- Machine Learning Fundamentals
- Full Stack Development
- Open Source Development

Featured Projects

Personal Portfolio Website (React.js + Vite)

Technologies :- React.js, Vite, JavaScript, CSS

- Developed a modern and responsive portfolio website to showcase technical skills, projects, achievements, certifications, and learning journey.
- Implemented component-based architecture, smooth navigation, and interactive UI elements.
- Focused on responsive design and professional personal branding.

FAQify – React FAQ Application

Technologies :- React.js, JavaScript, Framer Motion, CSS

- Built an interactive FAQ platform featuring accordion functionality, search capabilities, dark mode, and favorite questions.
- Implemented smooth animations and user-friendly navigation.
- Enhanced understanding of React state management and reusable components.

Geography Map Quiz Game

Technologies :- HTML, CSS, JavaScript

- Developed an educational quiz game where users identify countries on an interactive map.
- Added scoring mechanisms, level progression, and leaderboard features.
- Improved skills in DOM manipulation and interactive web development.

Bus Ticket Booking System

Technologies :- C++

- Designed a menu-driven ticket reservation system using Object-Oriented Programming concepts.
- Implemented seat booking, cancellation, and availability management features.
- Utilized vectors and structured programming techniques for efficient data handling.

Banking Management Application

Technologies :- JavaScript

- Created a banking simulation system to perform account-related operations.
- Implemented transaction handling and balance management functionality.
- Strengthened logical programming and application flow design skills.

Interactive Web Games Collection

Technologies :- HTML, CSS, JavaScript

- Developed multiple browser-based games focusing on user interaction and creative gameplay.
- Applied animations, responsive layouts, and event-driven programming.

- Enhanced front-end development and problem-solving skills.

Aesthetic HTML-CSS Games Collection

Technologies :- HTML, CSS, JavaScript

- Built visually appealing mini-games with modern UI design.
- Implemented game logic, animations, and responsive layouts.
- Focused on combining creativity with technical implementation.

Healthy Lifestyle Website

Technologies :- HTML, CSS

- Designed a fitness and wellness website with a clean and modern interface.
- Developed responsive pages showcasing healthy habits, nutrition, and lifestyle tips.
- Improved front-end design and layout structuring skills.

Story Telling Interactive Website

Technologies :- JavaScript, HTML, CSS

- Developed an interactive storytelling experience using dynamic content rendering.
- Enhanced user engagement through creative interface design and smooth interactions.
- Practiced JavaScript event handling and content management.

Favorite Toggler Application

Technologies :- HTML, CSS, JavaScript

- Created a user-friendly application allowing users to mark and manage favorite items.
- Implemented dynamic state updates and interactive UI elements.
- Improved understanding of DOM manipulation techniques.

Expense & Productivity Applications

Technologies :- Python, Google AI Studio

- Developed productivity-focused applications including habit tracking and expense management tools.
- Implemented record management, progress tracking, and data organization features.
- Strengthened programming fundamentals and application development skills.

Python Utility Projects Collection

Technologies :- Python

Projects include :-

- Password Generator
- To-Do List Application
- Word Counter
- Grade Calculator
- Simple Calculator
- Dice Simulator
- Multiplication Table Generator
- Reverse Number Program
- Quiz Game
- Even/Odd Number Checker

Key Highlights :-

- Developed multiple beginner-to-intermediate Python applications.
- Applied concepts including loops, conditionals, functions, randomization, string manipulation, and data structures.
- Strengthened problem-solving and programming fundamentals through hands-on implementation.

Open Source & GitHub Activities

- Maintain 30+ public repositories showcasing programming and development skills.
- Regularly upload coding projects and academic work to GitHub.
- Practice Git version control and collaborative development workflows.
- Build projects using C++, Python, JavaScript, HTML, CSS, React.js, and modern development tools.
- Continuously improve project documentation and repository management practices.

Core Competencies

- Software Development
- Frontend Development
- Problem Solving
- Algorithmic Thinking
- Object-Oriented Programming
- Responsive Web Design
- Version Control (Git & GitHub)
- Debugging & Testing
- Technical Documentation
- Project Development

Key Achievements

- Built and published 30+ coding and development projects on GitHub.
- Developed real-world projects using C++, Python, JavaScript, React.js, HTML, and CSS.
- Created a professional portfolio website to showcase technical work and achievements.
- Participated in coding challenges, hackathons, and project-based learning activities.
- Consistently expanding technical skills through self-learning and hands-on project development.

Certificate

- **HTML Certification** | Simplilearn (2025)

Leadership & Collaboration

- Collaborate with peers on academic and development projects.
- Actively participate in technical discussions and knowledge sharing.
- Demonstrate initiative in learning new technologies independently.
- Manage multiple development projects while balancing academic responsibilities.

Personal Strengths

- Growth Mindset
- Quick Learner
- Adaptability
- Creativity
- Time Management
- Team Collaboration
- Leadership Potential
- Attention to Detail
- Communication Skills
- Continuous Learning

Career Interests

- Software Engineering
- Frontend Development
- Full Stack Development
- Artificial Intelligence
- Machine Learning
- Data Science
- Open Source Development
- Product Development

Professional Motto

"Building innovative digital solutions through continuous learning, creativity, and technology."
